Aim

Mapping of existing biosecurity projects, training & websites

Broaden our perspective and capture a global understanding of biosecurity websites

Methodology

STSM methodology covered in “Mapping on biosecurity projects and trainings”

Utilized **ChatGPT** as a search tool in the VM

Examined 163 websites; **60** contained biosecurity-related information

Data categorized per predefined criteria from Ghent meeting (Seagerman et al. submitted)

Results: Animal species in focus of biosecurity webpage?

Species	Number of websites
Multispecies	33
Swine	7
Poultry	7
Cattle	7
Sheep	2
Food safety	2
Equine	1
Aquatic	1

Results: Is the website interactive?

Results: What type of biosecurity information is provided?

Results: Can you download biosecurity related information from the website?

Results: Can you get a certificate on biosecurity from this webpage?

■ Yes ■ No ■ NA

Website recommendation

- 1) Ensure free access to information
- 2) Enhance interactivity with graphics, pictures, and videos in the interface
- 3) Include coverage for multiple species
- 4) Internal and external biosecurity information
- 5) Basic and advance level of information
- 6) Biosecurity plans focused on diseases
- 7) Enable the ability to download relevant material
- 8) Include self-tests and training options

Acknowledgments

- We would like to thank all the **COST action BETTER** and especially **WG4 members** who participated in development of the survey.
- Especially our gratitude goes towards **Marco De Nardi, Alberto Allepuz, Handan Hilal, Daniele De Meneghi, Jarkko Niemi, Murat Yilmaz, Nancy De Briyne, Banu Yücel-Toy and Marnie Brennan.**
- With the help in translation, we would especially like to thank: **Blerta Mehmedi, Rreze Gecaj, Wiebke Jansen, Teresa Nogueira, Ramazan Yildiz, Ipek Keskin, Alberto Allepuz and Daniele De Meneghi.**
- We would also like to thank **Veterinarians of Europe (FVE)** for help with development and distribution of the survey.
- The STSM “Mapping on biosecurity projects and trainings” and VM “Mapping on existing biosecurity websites” were funded by COST action BETTER.
